PROFESSIONAL EXPERIENCE

Software Engineer

Almondz Global Trade

02/2024 – present
Delhi, India

- Developed a brokerage app to streamline trading processes and user engagement.
- Created an **IPO application** feature enabling users to seamlessly apply for company IPOs.
- Developed a **client back-office portal** for users to access trading details, including ledger, statements, reports, holdings, and trades.
- Built a robust **e-KYC system** with features like phone and email verification, PAN and Aadhaar verification via DigiLocker, bank account verification, and e-Sign integration.
- Implemented additional functionalities, including a buyback process for trading assets and a refer-and-earn program to enhance user engagement.

Software Engineer

VoxtrrLabs

02/2022 – 02/2024
Gurugram, India

- **SmartMoney (Angel One)**: Developed a platform to provide trading knowledge with courses covering categories like mutual funds and futures/options. Users earn badges upon course completion and can track progress on a personalized dashboard.
- Built a review system **Smarrtr** which help enabling users to view detailed reviews of companies, products, and services
- Created a dashboard (**Samplerr**) for managing ad campaigns, allowing users to assign campaigns to brand managers, schedule times, and target specific locations..

Frontend Developer

WeSolveForYou

10/2021 – 02/2022
Noida(Remote), India

- Developed and learn hands-on experience in router configurations, animations, Redux Thunk, and Git.
- Worked on a sales channel product, contributing to the development of a dashboard website.
- Developed the WeSolveForYou website using React.
